VOLUME CONTENTS

VOLUME 56 1992 NUMBER 1

A. P. IVANOV: Collision-free motion in systems with non-retaining constraints 1
V. F. ZHURAVLEV: Singular directions in the configuration space of linear vibrating systems 13
A. V. PECHENEV: The averaging of systems with a hierarchy of phase rotation speeds 20
O. V. KHOLOSTOVA: The stability of a particular motion of a solid with a viscoelastic membrane in a circular orbit 25
V. P. BOLDIN, S. B. MALANOV and G. A. UTKIN: Formulation of boundary-value problems for the dynamics of two-dimensional systems with moving loads and fastenings 30
S. A. YEGORUSHKIN and A. G. KULIKOVSKII: The stability of the solutions of some boundary-value problems for hyperbolic equations 36
A. I. BUNIMOVICH and A. V. DUBINSKII: Calculation of rotational derivatives for "local" interaction of a flow with the surface of a body 45
N. A. GUMEROV: Quasi-monochromatic weakly non-linear waves in a low-dispersion bubble medium 50
I. S. GINZBURG, V. M. YENTOV and E. V. TEODOROVICH: Renormalization group method for the problem of convective diffusion with irreversible sorption 59
P. A. MAZUROV: A variational approach in theories of filtrational consolidation and two-phase filtration 67
M. A. RVACHEV: Stress functions in multiply connected volumes 76
YE. L. NAKHMEIN and B. M. NULLER: Combined periodic boundary-value problems and their applications in the theory of elasticity 82
V. D. POTAPOV: Stability of a viscoelastic rod subject to a random stationary longitudinal force 90
A. A. YEVTUSHENKO and O. M. UKHANSKAYA: Non-stationary frictional heating in sliding compressible elastic bodies 95
S. M. KOZLOV. On the domain of variation of added masses, polarization and effective characteristics of composites 102
D. B. BALASHOV: Simple waves in Prandtl–Reuss equations 107
M. ERGASHOV: A study of the propagation of elastic waves in wound structures taking into account their rotation under extension 117
L. A. FIL'SHTINSKII and L. I. FOMENKO: The dynamic stress of a conducting half-space with a curvilinear cut in a strong magnetic field (antiplanar deformation state) 125
V. V. BOLOTIN: On the dynamic propagation of cracks 132
E. L. AMROMIN, A. N. LORDKIPANIDZE and YU. S. TIMOSHIN: The introduction of "forbidden" amplitudes when calculating the wave resistance of a ship 143
T. S. KAGADII, L. V. MASSAKOVSKAYA and A. V. PAVLENKO: The perturbation method in a spatial problem of the linear viscoelasticity of anisotropic bodies 147
YU. B. NAZARENKO: The formation of subsurface rock breakdown zones around workings during their driving by drilling and blasting 152

VOLUME 56 1992 NUMBER 2

F. L. CHERNOUS'KO: Control synthesis in a non-linear dynamical system 157
A. N. KRASOVSKII: Control in mixed strategies on the minimax of an integral functional 167
A. B. NAISHUL: Three-dimensional motion of a material point 175
S. A. AGAFONOV: Stability of motion of non-conservative mechanical systems 183
S. A. DOVBYSH: Kolmogorov stability, the impossibility of Fermi acceleration and the existence of periodic solutions in some Hamiltonian-type systems 188
S. V. BOLOTIN: Variational methods of constructing chaotic motions in rigid-body dynamics 198
Ye. P. KUBYSHKIN: Optimal control of the rotation of a solid with a flexible rod 205
O. Yu. DINARIYEV: Signal propagation in a relativistic fluid with viscosity and heat conduction 214
V. A. GORODTSOV: Fast asymptotic form of the resistance of bodies in a waveguide layer of non-uniform fluids 222
Yu. N. GORDEYEV: A disc-shaped hydraulic fracture crack in a poroelastic medium 229
Ye. N. VIL'CHEVSKAYA and S. K. KANAUN: Integral equations for a thin inclusion in a homogeneous elastic medium 235
I. A. LUBYAGIN, D. A. POZHARSKII and M. I. CHEBAKOV: Embedding of a punch in the form of an elliptic paraboloid into an elastic spatial wedge 244

L. M. ZUBOV and A. N. RUDEV: An effective method of verifying Hadamard's condition for a non-linearly elastic compressible medium 252
I. V. DOROKHOV, O. D. PRYAKHINA and M. R. FREIGEIT: On the action of an unsteady load on a system consisting of a massive punch and a layered foundation 261
T. I. BELYANKOVA and V. V. KALINCHUK: On shear vibrations of a punch on the surface of a pre-stressed half-space 267
S. V. YERMAKOV: Investigation of the formulation of the boundary-value problem of the local theory of elastoplastic processes 274
A. R. ISAYUK-SAYEVSKAYA and A. S. KEL'ZON: Dynamics of a high-revolution compressor 282
N. N. KOCHINA: The motion of a viscous fluid in a pipe of finite length 287
N. G. KUZNETSOV: The lower bound of the eigenfrequencies of plane oscillations of a fluid in a channel 293
M. A. BRUTYAN and P. L. KRAPIVSKII: Internal properties of some rheological models of a viscoelastic fluid 298

VOLUME 56 1992 NUMBER 3

G. G. CHERNYI: The asymptotic method in problems on the motion of bodies in a melting medium 303
A. I. RYLOV: Monotonicity properties of certain two-dimensional incompressible vortex flows and subsonic gas flows 319
V. N. GOLUBKIN and V. V. NEGODA: Improving the aerodynamic performance of small-aspect-ratio wings at hypersonic speeds 324
N. YU. KOLPAKOV and V. I. KOLESNICHENKO: The effect of meridional electric vortex flow on the azimuthal rotation of a fluid 333
R. R. GADYL'SHIN: The method of matched asymptotic expansions in the problem of the Helmholtz acoustic resonator 340
A. V. MARCHENKO: On the propagation of discontinuities in a drifting ice cover 346
L. V. PETUKHOV: Dual estimates in problems of design of elastic structures 358
V. YA. TERESHCHENKO: An algorithm and error estimates for the variational boundary-element method in elasticity theory 365
L. D. AKULENKO and G. V. KOSTIN: The perturbation method in problems of the dynamics of inhomogeneous elastic rods 372
B. V. YERMOLAYEV: The use of generalized functions in the problem of elastic oscillations of a composite rod 383
P. E. TOVSTIK: Free high-frequency vibrations of anisotropic plates of variable thickness 390
V. P. LEVITSKII and V. M. ONYSHKEVICH: Heat transfer through a rigid disc pressed into an elastic half-space 395
A. G. KOLPAKOV: On the thermo-elasticity problem of non-uniform plates 402
I. V. PANFEROV: Stresses in a transversely isotropic conical elastic pipe of constant thickness under a thermal load 410
I. P. GETMAN and V. A. MOL'KOV: The effective characteristics of piezoactive composites with cylindrical inclusions 415
V. Z. PARTON and M. L. FIL'SHTINSKII: The steady-state wave process in a piezoelectric layer and half-layer weakened by tunnel cuts (antiplane deformation) 424
V. V. SIL'VESTROV: Effective solution of the fundamental quasi-periodic problems of the theory of elasticity for a plane with cuts distributed along a straight line 432
G. V. GORR: A new solution of the generalized problem of the motion of a body with a fixed point 443
O. V. MUKHTAROVA and L. P. SMIRNOV: The effect of the surface tension gradient on the motion of a spherical and deformed drop 446
V. B. GORSKII: The two-dimensional vortex motions of a viscous incompressible fluid 451
A. C. SAVIN: The generation of surface waves by a buoyant vortex ring 453
V. A. VOL'PERT and B. S. EL'KIN: The existence and stability of steady states of combustion in a flow 456
G. N. MIRENKOVA and E. G. SOSNINA: Stresses on the surface of a rigid needle in an orthotropic elastic medium 460
M. A. SUMBATYAN and E. A. TROYAN: Reconstruction of the shape of a convex defect from a scattered wave field in the ray approximation 464

VOLUME 56 1992 NUMBER 4

L. M. MARKHASHOV: Klein's group-theoretic conception in the mechanics of a material point 469
P. S. KRASIL'NIKOV and V. N. TKHAI: Reversible systems. Stability at 1:1 resonance 475
S. P. SOSNITSKII: Poisson stability of reversible systems 484
D. V. TRESHCHEV: Loss of stability in Hamiltonian systems that depend on parameters 492
L. B. RAPOPORT: Stability of the equilibrium of a system with single-sided constraints and the sign-definiteness of a pencil of quadratic forms in a cone 501
Ya. V. TATARINOV: Consequences of non-integrable perturbation of integrable constraints: non-linear effects of motion near the equilibrium manifold 507
S. V. CHAIKIN: The positions of relative equilibrium in the circular orbit of an elastic artificial satellite and their stability 518

A. P. IVANOV: Energetics of a collision with friction 527
S. A. DOVBYSH: The separatrix of an unstable position of equilibrium of a Hess–Appelrot gyroscope 534
M. A. ARGUCHINTSEVA and N. N. PILYUGIN: Extremal problems of heat transfer to three-dimensional bodies at hypersonic speeds 545
I. G. BRYKINA, V. V. RUSAKOV and V. G. SHCHERBAK: Approximate formulas for the heat fluxes to the surface of three-dimensional bodies 559
R. V. GOL'DSHTEIN and A. B. MOSOLOV: Fractal cracks 563
A. L. KUNITSYN and A. A. TUYAKBAYEV: The stability of Hamiltonian systems in the case of a multiple fourth-order resonance 572
A. V. STEPANOV: The sign-definite criterion of a homogeneous polynomial in a cone 576
V. Ya. DZHAFAROV: Multivalued synthesis for one class of controllable systems 581
P. V. KHARLAMOV: A critique of some mathematical models of mechanical systems with differential constraints 584
V. V. KOZLOV: The problem of realizing constraints in dynamics 594
A. F. SIDOROV: Letter to the Editor 601

VOLUME 56 1992 NUMBER 5

Yu. A. ANTIPOV and N. Kh. ARUTYUNYAN: Contact problems of elasticity theory for wedge-shaped regions under conditions of friction and adhesion 603
S. V. KUZNETSOV: A direct version of the method of boundary integral equations in the theory of elasticity 617
V. Ya. TERESHCHENKO: Uncoupled dual formulations of the variational boundary element method in problems of the theory of elasticity 623
K. Yu. VOLOKH: Regular asymptotic methods in calculations of three-layer plates 631
D. D. ZAKHAROV: Asymptotic analysis of three-dimensional dynamical elastic equations for a thin multilayer anisotropic plate of arbitrary structure 637
Yu. D. KAPLUNOV and Ye. V. NOL'DE: Two-parameter asymptotic analysis of the dynamical equations of the theory of elasticity for the bending of a plate 645
S. A. NAZAROV and O. R. POLYAKOVA: Deformation of elastic bodies with thin ligaments 651
G. Ya. POPOV: The non-axisymmetric problem of the stress concentration in an unbounded elastic medium near a spherical slit 665
Ye. V. GLUSHKOV, N. V. GLUSHKOVA and Ye. V. KIRILLOVA: The dynamic contact problem for a circular punch adhering to an elastic layer 675
F. M. BORODICH and A. B. MOSOLOV: Fractal roughness in contact problems 681
Ye. G. POLISHCHUK: The boundary element method for calculating visco-rigid plastic flows 691
V. M. NEBOGATOV and Yu. V. NEMIROVSKII: The lower limits of the limit loads of perfectly plastic structures 697
F. L. CHERNOUS'KO: Bounded controls in distributed-parameter systems 707
V. F. ZHURAVLEV: Oscillation shape control in resonant systems 725
A. G. IVANOV: Optimal control of almost-periodic motions 737
V. Ye. BERBYUK: Using first integrals to estimate limiting possibilities of optimal control systems 747
R. GABASOV, F. M. KIRILLOVA and O. I. KOSTYUKOVA: A method for the optimal control of the motion of a dynamic system in the presence of constantly operating perturbations 755
V. N. KUTRUNOV: The quaternion method of regularizing integral equations of the theory of elasticity 765
V. M. LYUBIMOV and G. I. PSHENICHNOV: The natural vibrations of a momentless spherical shell 771
G. I. NAZAROV and A. A. PUCHKOV: The problem of torsion of a hollow circular cylinder with variable shear moduli 775
M. A. SUMBATYAN: A method of global random search in inverse problems with application to the problem of recognizing the shape of a defect 779
A. G. KOLPAKOV: The long-term memory effect in homogeneous plates 783

VOLUME 56 1992 NUMBER 6

L. I. SEDOV: On gravitational fields in Riemannian spaces 789
V. V. KOZLOV: Linear systems with a quadratic integral 803
N. K. MOSHCHUK: An approximate method for analysing stochastic mechanical systems 811
V. N. SKIMEL: The application of Lyapunov functions to some problems of the acceptability of approximate solutions of differential equations 821
M. U. AKHMETOV and N. A. PERESTYUK: Periodic and almost periodic solutions of strongly non-linear impulsive systems 829
A. V. KARAPETYAN and I. D. SAKHOKNA: On bifurcation and stability of steady motions of two gravitating bodies 839
A. Ya. KRASINSKII: On the stability of steady motions of systems with cyclic coordinates 843
G. N. MIL'SHTEIN and L. B. RYASHKO: Stability and stabilization of autonomous system orbits under stochastic perturbations 855

V. I. KALENOVA, V. M. MOROZOV and M. A. SALMINA: Controllability and observability in the problem of stabilizing mechanical systems with cyclic coordinates 863
Yu. K. ZOTOV and A. V. TIMOFEYEV: Controllability and stabilization of programmed motions of reversible mechanical and electromechanical systems 873
V. Yu. TERTYCHNYI: Integral estimation and adaptive stabilization of non-holonomic controlled systems 881
B. I. KONOSEVICH and S. S. SAVENKO: The inverse problem of the scatter of unguided missiles 889
G. A. LEONOV and A. V. MOROZOV: The global stability of the steady rotations of a solid 897
S. A. BELIKOV: The local boundedness of the perturbed motions of an imperfect gyroscope in gimbals with dissipative and accelerating forces 903
L. D. AKULENKO: Oscillations of a rigid body containing an elastic element with distributed parameters 911
A. A. BUROV and O. S. RYZHOV: The onset of stochastic pulsations at the early non-linear stage of the development of perturbations in the jet of an incompressible fluid propagating along a wall 921
G. A. TIRSKII, S. V. UTYUZHNIKOV and N. K. YAMALEYEV: Application of the small-parameter method to the problem of the spatial flow of a viscous gas past bodies 929
S. V. ZHLUKTOV, S. V. UTYUZHNIKOV, V. S. SHCHELIN and V. G. SHCHERBAK: Comparison of gas-dynamic models for hypersonic flow past bodies 939
M. G. MISHANINA and O. V. MUSYCHUK: Analysis of non-linear dynamic systems excited by intense non-white noise 945
B. N. SOKOLOV: Restricted positional control of a large dynamical system 949
S. V. SOKOLOV: Analytical determination of time-dependent functions of drifts of a triaxial gyrostabilizer 955
S. V. BOLOTIN: Letter to the Editor 959
